

THE IDEA

Vanished! Without a trace. Deep in the Canadian wilderness, a team of leading scientists set out to locate a rare flower. Their mission complete, the scientists were headed home. But they never arrived. Your world-famous team is summoned for this incredibly challenging search-and-rescue mission.

Your world-famous team is summoned for this challenging search-and-rescue mission in which you'll apply your freshly acquired skills in GPS navigation, high-angle rescue and more! Can your team execute this rescue before the clock runs out? Communication and planning will be the keys to your success.

THE DETAILS

- Your team must ultimately locate the scientists, treat their injuries, and evacuate them to safety
- Team members will be split up and trained in one area of specialization that may include:
 - high angle rescue
 - rope stretcher construction
 - GPS navigation
 - wilderness first-aid and base camp management
 - radio communication
- Once the Search and Rescue begins all of these diverse skills must be integrated with precision and speed

TEAM BUILDING PROGRAMS

Summit Team Building's non-traditional methods delve into the heart of team dynamics and provide learning with lasting results.

Paddi Riopelle -
Human Resources Manager,
Henry Schein Arcona

THE RESULTS

- Find the winning balance between planning and execution
- Create "big-picture" thinking and generate interdepartmental collaboration
- Provide a physically active experience that gets participants outdoors
