THE IDEA

It's been said, "To understand a man, you've got to walk a mile in his shoes, whether they fit or not." It's hard for most of us to imagine coping with a disability in an emerging country with little or no support. But this is the reality for thousands of people around the world.

Through our partnership with a local prosthetic clinic and their relationships with clinics in under-resourced countries around the world, this program will have your team step up to compete, to perform and to help our global neighbours in a truly meaningful way. By providing much needed prosthetic devices to hospital staff, your team will help change lives in ways that are immeasurable.

You may never walk a mile in their shoes, but thanks to the efforts of your team, they will be able to!

THE DETAILS

- Your group will be divided into small competitive teams
- Teams will complete a variety of challenges that will earn them points and parts for the final prosthesis assembly
- Teams will have a chance to send a message that will go to a prosthesis recipient
- Program concludes with a message from our partners around the world and award ceremony for the winning team who accumulated the most points

THE RESULTS

- Foster creativity and celebrate team success
- Collaborate and work together to achieve success
- Fulfill the growing desire to give back in a meaningful way
- Meet challenges with new enthusiasm

TEAM BUILDING PROGRAMS

Everyone participated and had a good time. Everyone respected you along with the rest of your team. They had fun. How do you beat that? Outstanding! Job well done!
