

## TEAM BUILDING PROGRAMS

- Indoor    Active    Competitive    Give Back  
 Outdoor    Less Active    Non-competitive

## THE IDEA

Summit's LEGO® SERIOUS PLAY® team building programs were developed to bring the creativity and engagement of play into the serious business of building high performance teams. The LEGO® Bricks® are a means to develop effective story telling through building and sharing metaphors that convey business situations and development opportunities. Participants unleash their creativity and innovation and connect in a whole new way while discussing team opportunities, goals, vision, values and more. In doing so, complexity is reduced, and valuable knowledge is shared. In this way, LEGO® SERIOUS PLAY® makes it easier and more constructive to handle the challenges that teams and organizations are faced with. LEGO® SERIOUS PLAY® is proven to be relevant, engaging and effective for any group size whether you have 4 or 200 participants. This indoor based program requires open table space for building and discussing. Program duration 90 minutes to 2 hours.

*"I was so amazed at how engaged everyone was with the Lego Team Building program. It brought out much needed energy and collaboration and allowed our team to gain a deeper learning through the creative process of building and storytelling. I would highly recommend this Lego program Aviva Canada*

## THE DETAILS

- Intro activity will have participants creating an individual creation that tells a story about themselves
- Groups will be formed, and will design a collaborative and creative piece that tells a story about their team - could be a vision of future strategy, current goals or aspirational ones etc - you decide!
- stories will be presented to the plenary and ideas shared

## THE RESULTS

- Build relationships by allowing your team to play with a purpose
- Inject a high-energy event into your offsite meetings
- Approach your team vision from a different perspective involving play, creativity and collaboration.
